DETAILED ACTION

The Remarks and Amendments filed 19 December 2005 have been entered.

Allowable Subject Matter

Claims 1-22 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Re claims 1-12: The best prior art of record discloses a light-emitting unit comprising a substrate, a first light-emitting element mounted on the obverse surface of the substrate and a second light-emitting element mounted on the reverse surface of the substrate, a first lens arranged for dispersion of light and enclosing the first light-emitting element, a second lens arranged for dispersion of light and enclosing the second light-emitting element, a first wiring pattern formed on the obverse surface of the substrate and a second wiring pattern formed on the reverse surface of the substrate, wherein each lens includes a periphery which is adjacent to at least a part of an edge of the substrate. However, the prior art fails to teach or fairly suggest a light-emitting unit wherein a reflecting layer is arranged between each lens and a corresponding one of the first and second wiring patterns, wherein the reflecting layer is formed with an opening in which the corresponding one of the first and second wiring patterns is partially exposed, as claimed in claim 1. Claims 2-12 are allowable by virtue of their dependency.

Re claims 13-19: as set forth in the previous office action.

Re claims 20-22: as set forth in the previous office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
